Professional summary

Mechanical Design & Manufacturing & Production Engineer with 5+ years of experience in sheet metal, Metal Fabrication, CNC manufacturing, Fiber Laser cutting, Punching, Bending, and production engineering. Highly skilled in SolidWorks, AutoCAD, and manufacturing process optimization. Capable of turning complex designs into practical, factory-ready parts with a focus on efficiency and quality.

Work History

Production and Design Engineer, 11/2022 – Current.

AL-Monawara for Metal Production – Huraymila, Saudi Arabia.

- Design products using SolidWorks.
- Managed daily production using Fiber Laser, CNC Punching, Bending and Shearing machines.
- Make programming for Fiber Laser machine.
- Make programming for punching machine.
- Scheduled manufacturing teams to achieve timely project completion.
- Adapted engineering designs to meet product requirements.
- Met client construction needs through effective design.

Major Clients: -

- | | | |
|----------------------|----------------------|---------------------|
| • ROSHN | • Nadec | • Saudi Post |
| • Shapoorji Pallonji | • Al Qima | • Quantum Energy Co |
| • Abr Construction | • Al Jomiah | • GASCO |
| • Serh Attaqnia | • Aitco construction | • Anmat Contracting |
| • China Harbour | | |

Manufacturing Engineer, 01/2022 – 10/2022

Elite – Cairo, Egypt.

- Responsible for operating fiber laser machine.
- Design products using solid works.
- Responsible for all the product manufacturing process like Fiber laser, Bending, Welding.

Manufacturing Engineer, 03/2021 – 12/2021

Phoenix Cnc – Cairo, Egypt.

- Responsible for the product manufacturing process like Fiber laser, Plasma, Router, Welding.
- Applied statistical methods to estimate future manufacturing requirements.
- Developed products and prototypes for various types of product designs.
- Resolved technical issues and provided approval recommendations effectively.

Assembly, Testing and Quality Engineer, 07/2019 – 02/2021

Simplex Arabia, CNC – Cairo, Egypt.

- Quality section team leader.
- Scheduling tasks and priorities according to the delivery plan.
- Review and test the machines to ensure quality terms.
- Test machines and solve its technical problems.
- Train customers how to operate machines.
- Ensure quality terms for the production process, manufactured items and purchased material.
- Machines like, Plasma, Router.

Education

B.S. Mechanical Engineering, Mechatronics Section,
Benha Faculty of Engineering – Benha, Egypt.
Graduated: 2017

Skills

CAD Software: -

- SolidWorks

- AutoCAD

CAM Software: -

- Cnc Kad
- Cypcut

- Delem software
- Tubepro

Manufacturing

- Fiber Laser
- Bending

- Punching
- Welding

Other: -

- Technical documentation

- Office

Training

- 2014-08: QARUN PETROLEUM COMPANY.
- 2016: Benha for Electronic Industries.

Activities

- 2016-03: How to make a simple robot.
IEEE, CIC Student Branch
- 2016-10: Won the 2nd place in Step up Competition.
IEEE Benha Student Branch
- 2017-08: 3D Printer Workshop.
